Universal SIM Cellular Modem

Why use a modem to monitor your system?

The e-sens compatible cellular modem uses built in 4G cellular technology to provide instant, 24/7 access to your water treatment controllers from any computing device with a browser.

Designed to meet increased demands for improved efficiency, a modem allows easy and reliable high-speed access to your controllers without running cables or interfacing with IT.

The continuous remote monitoring of your system and equipment provides complete visibility, resulting in faster response times and improved performance.

Allows easy and reliable high-speed access to your controllers without running cables or interfacing with IT.
